

# Effective Control of Powdery Mildew

Based on the patented strain of *Bacillus subtilis* IAB/BS03, AVIV™ is an advanced microbial fungicide that delivers broad spectrum disease control both in soil and on plant surfaces.

Use AVIV for effective control of Powdery mildew in grapes. With a four-hour restricted entry interval and zero-day pre-harvest interval, AVIV has the added benefit of controlling common fungal disease in grapes, including *Botrytis*.

AVIV fungicide's biological nature makes it the ideal complement to both organic and conventional production programs. With no MRL requirements AVIV can easily be integrated into production programs to improve your disease control results. AVIV microbial fungicide—the choice is clear.

## AVIV Provides Effective Controls of Powdery Mildew in Grapes

US1746, Table Grape, Fowler, CA - Sawtooth Ag Research Thompson Seedless - 24DAF, water volume = 100 gpa

**Always read and follow label directions.**
