ADVANCED MICROBIAL FUNGICIDE

## For Improved Emergence and Yield in Potatoes, Plus Late Blight Control

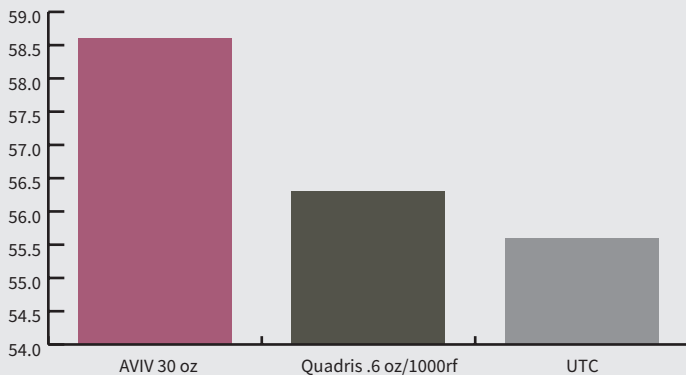

Based on the patented strain of *Bacillus subtilis* IAB/BS03, AVIV™ is an advanced microbial fungicide that delivers better plant emergence and more marketable yield.

An ideal option for potatoes, AVIV can be effectively sprayed throughout the season for a variety of benefits. Applied in the furrow at planting or through chemigation AVIV controls common soil diseases that can damage plants, while improving emergence. Seed piece applications also improve emergence and improve marketable yield. Foliar applications of Aviv provide strong disease control activity on Late blight.

AVIV can easily be integrated into production programs to improve your disease control results. AVIV microbial fungicide - the choice is clear.
