

TIMOREX GOLD®

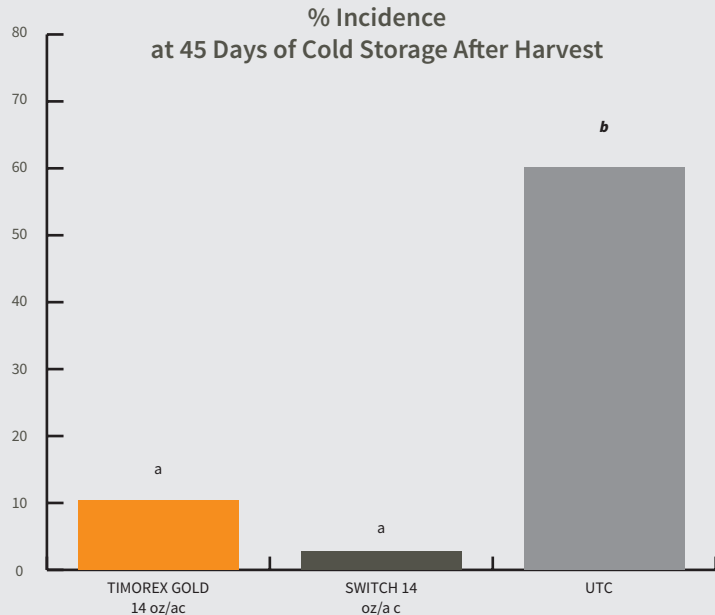

A BROAD SPECTRUM
NATURAL FUNGICIDE

For Control of Common Diseases in Blueberries

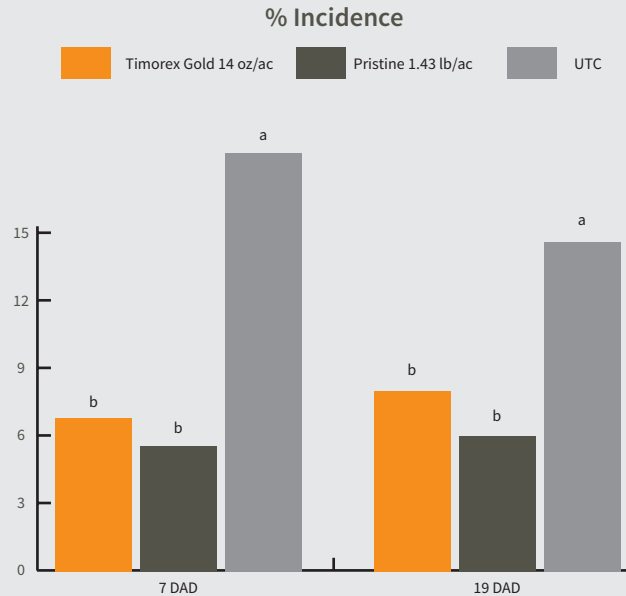

TIMOREX GOLD reduces harmful disease while improving overall yield.

Introducing TIMOREX GOLD®, a natural botanical broad-spectrum fungicide for control of common fungal diseases in berries, including strawberries, blueberries, raspberries and blackberries. Formulated to help keep early season disease pressures low, TIMOREX GOLD has a unique mode of action that helps prevent resistance development in synthetic disease control products and has been demonstrated to improve plant vigor and yield when used in rotational programs. Based on a complex blend of natural chemicals from a plant extract from the tea tree (*Melaleuca alternifolia*), TIMOREX GOLD is effective against a wide spectrum of berry diseases including *Botrytis*, *Monilinia*, *Alternaria* and Powdery Mildew. Additionally, TIMOREX GOLD is not subject to MRL restrictions and has a short pre-harvest interval, making it an excellent late-season choice.

Controls *Botrytis* (Grey Mold) Comparable to Conventional Standards

Control of *Monilinia* in Low-Bush Blueberries

Always read and follow label directions.

TIMOREX GOLD fungicide from Summit Agro USA is sold exclusively through Helena Agri-Enterprises and Tenkoz member companies. To see how TIMOREX GOLD can help improve your crop production, contact your Tenkoz member company or Helena Agri-Enterprises representative.
