TIMOREX GOLD®

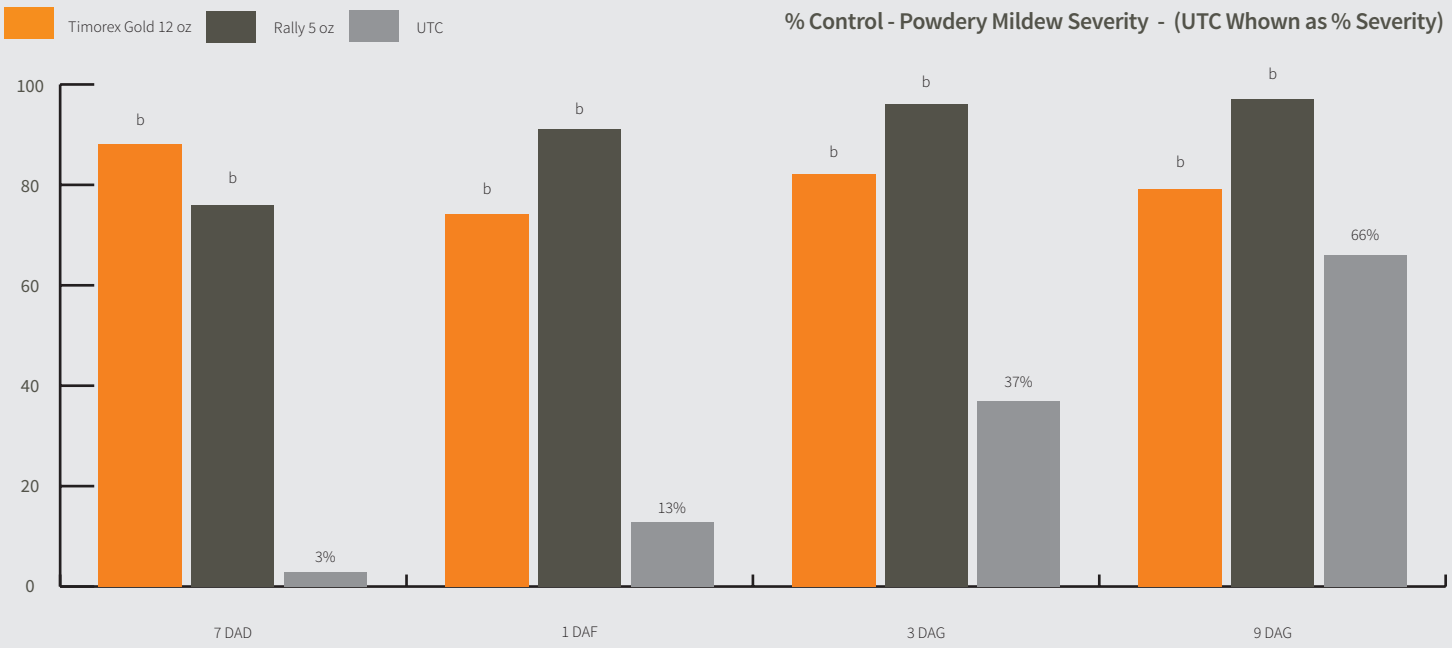
A BROAD SPECTRUM NATURAL FUNGICIDE

For Control of Powdery & Downy Mildew in Cucurbits

Mildew control comparable to conventional standards.

Introducing TIMOREX GOLD®, a natural botanical broad-spectrum fungicide for control of common fungal diseases in cucurbits, including melons, squash, zucchini, and cucumber. Formulated to help keep disease pressures low, TIMOREX GOLD has a unique mode of action that helps prevent resistance development in synthetic disease control products and has been demonstrated to improve plant vigor and yield when used in rotational programs. Based on a complex blend of natural chemicals from a plant extract from the tea tree (*Melaleuca alternifolia*), TIMOREX GOLD is as effective as the chemical standards against mildews in cucurbits. Additionally, TIMOREX GOLD is not subject to MRL restrictions and has a short pre-harvest interval, making it an excellent late-season choice.

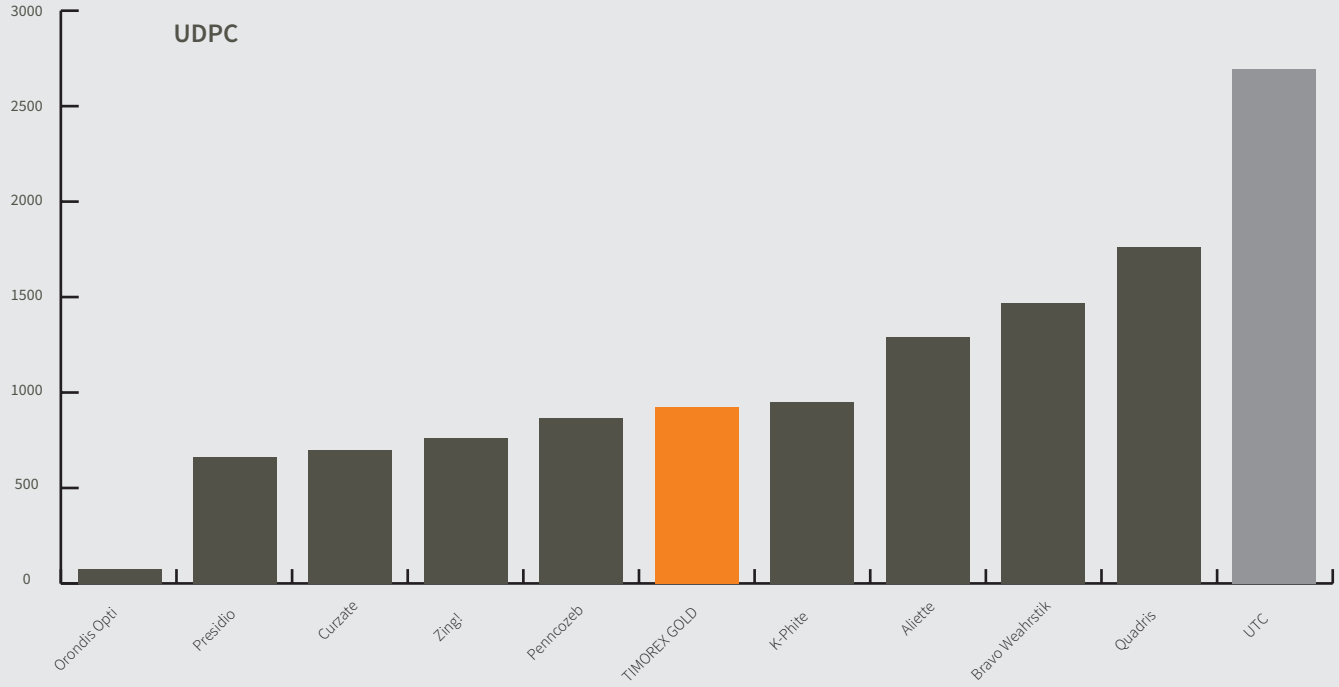
Excellent Control of Powdery Mildew in Cucurbits



US1618 – Simplot Grower Solutions, Porterville, CA, USA, 2016, applications every 7 days, (*Erysiphe cichoracearum*)

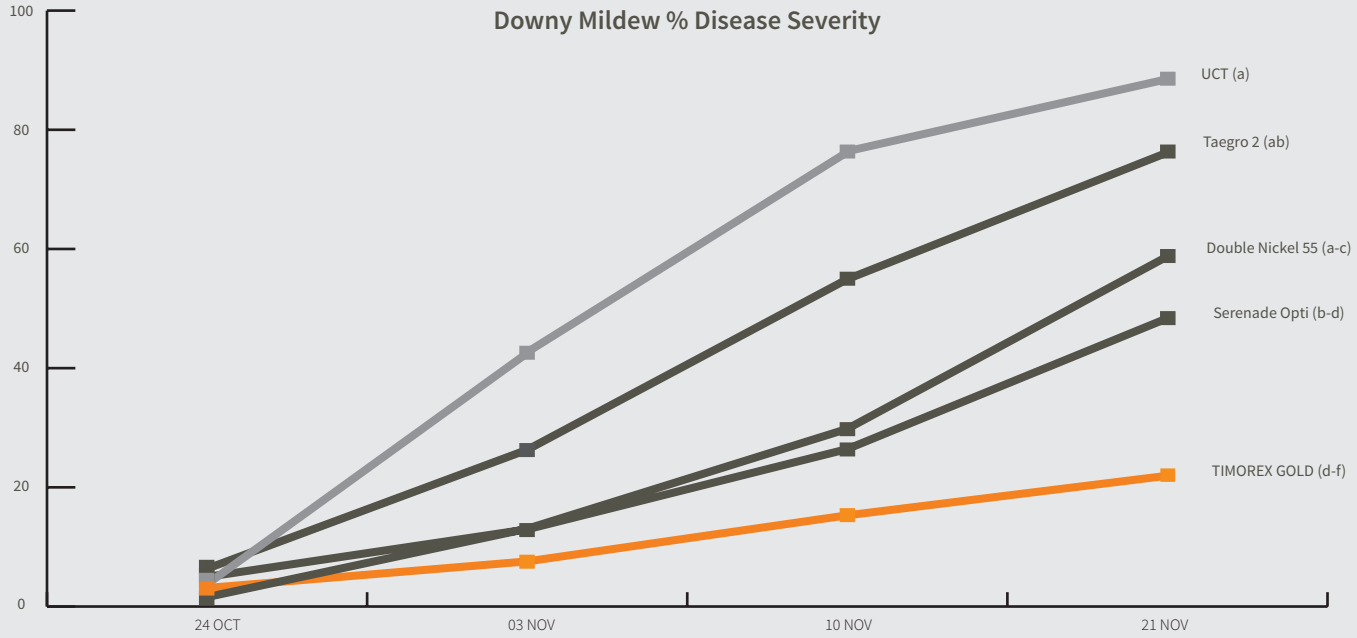
SummitAgro USA

Controls Downy Mildew Similar to the Standard Conventionals...



US1658, IFAS-Vallad, Balm, FL, USA (*Pseudoperonospora cubensis* on cucumber) 2016

...and Excellent Downy Mildew Control Compared to Other Biopesticides.



Always read and follow label directions.
