

TIMOREX GOLD®

A BROAD SPECTRUM
NATURAL FUNGICIDE

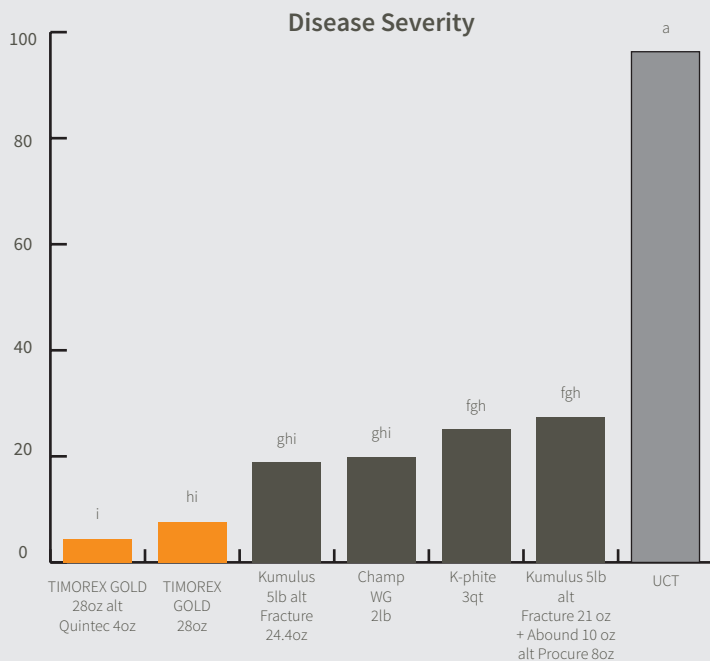

For Control of Powdery Mildew, Botrytis & Sour Rot

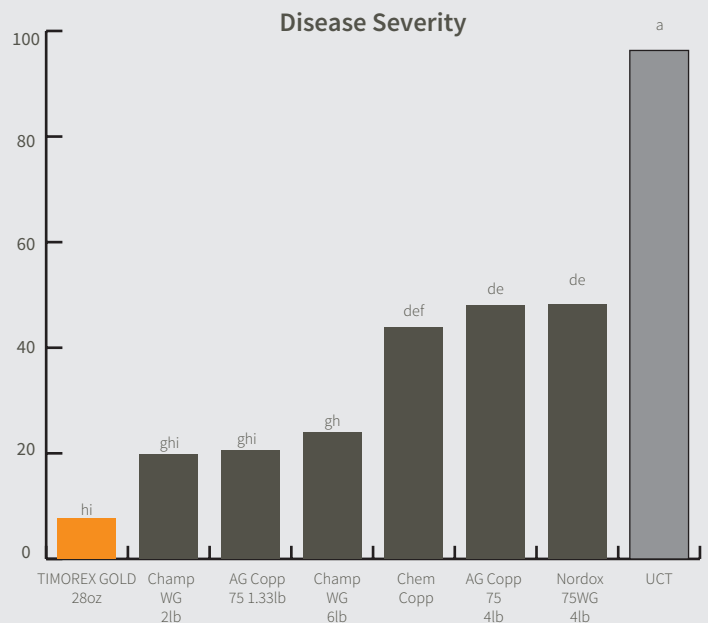

Mildew control comparable to conventional standards.

Introducing TIMOREX GOLD®, a natural botanical broad-spectrum fungicide for control of common fungal diseases in wine and table grapes. Formulated to help keep disease pressures low, TIMOREX GOLD has a unique mode of action that helps prevent resistance development in synthetic disease control products and has been demonstrated to hasten the onset of color prior to harvest. Based on a complex blend of natural chemicals from a plant extract from the tea tree (*Melaleuca alternifolia*), TIMOREX GOLD is effective against common fungal diseases, including Powdery Mildew, *Botrytis* (grey mold) and Sour Rot. Additionally, TIMOREX GOLD is not subject to MRL restrictions and has a short pre-harvest interval, making it an excellent late-season choice.

Control of Powdery Mildew Comparable to Standard Conventionals

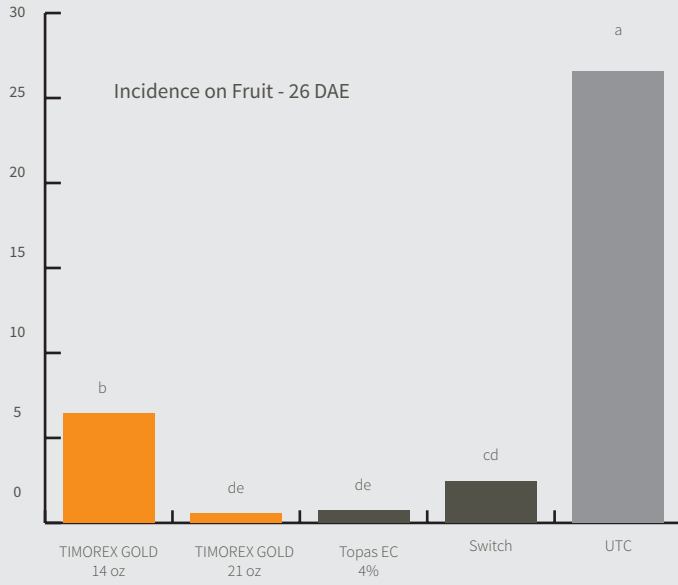

Excellent Powdery Mildew Control Among Organic Options

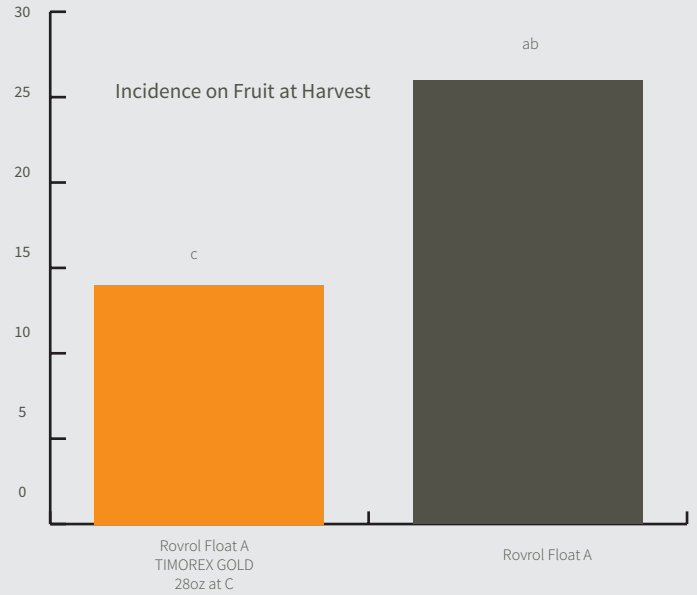

UC Davis, Courtland, CA - Gubler, 2013 Cultivar Chardonnay

Controls *Botrytis* Comparable to Conventional Standards

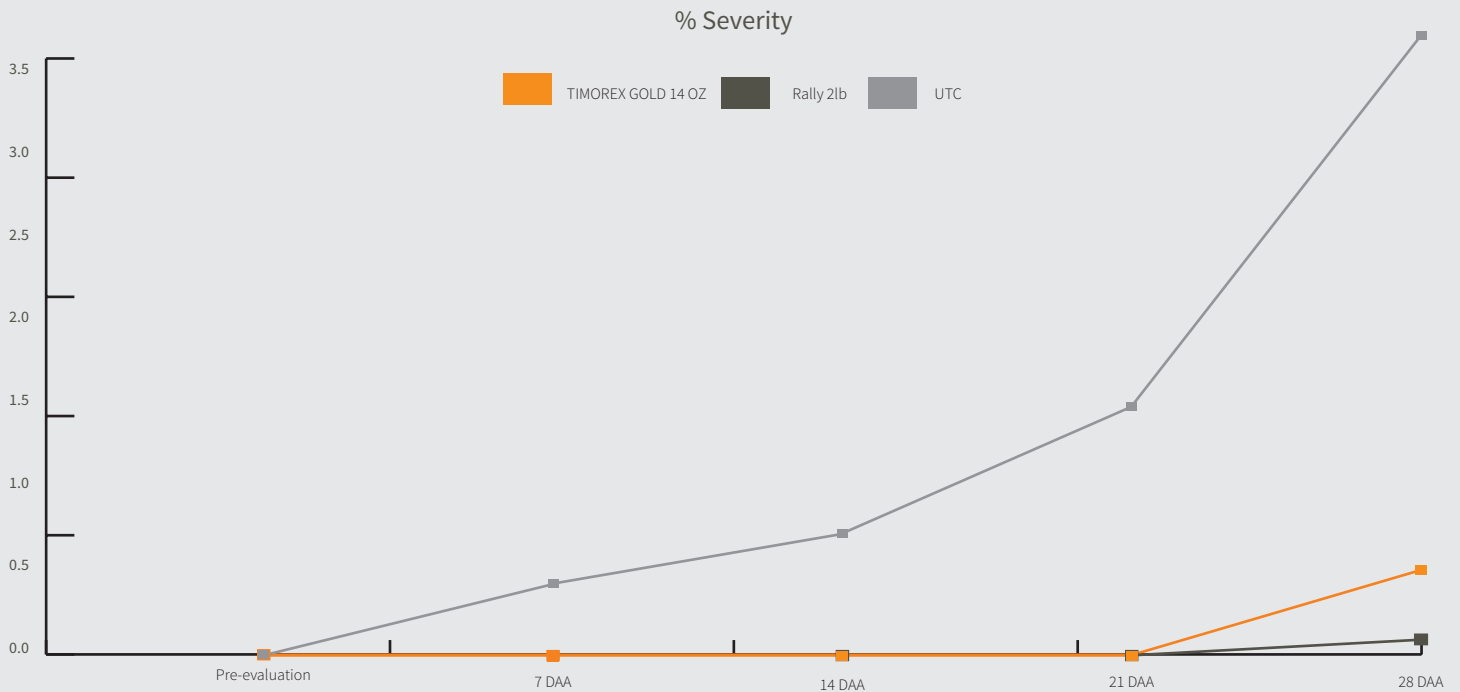

Alternation Programs Improve Sour Rot Control

EU 1685 Greece, 2015 - table grapes - 5 treatments every 7-10 days; Topas = penconazole; Switch = cyprodanil/fludioxinil

1860, South Africa, 2015 - Shiraz grapes - Rovral Flo = iprodione. A = berry softening; C = 7 days before harvest

Excellent Powdery Mildew Control

4 applications on 7 day cycle, Mexico, 2014

Always read and follow label directions.
