

TIMOREX GOLD®

A BROAD SPECTRUM
NATURAL FUNGICIDE

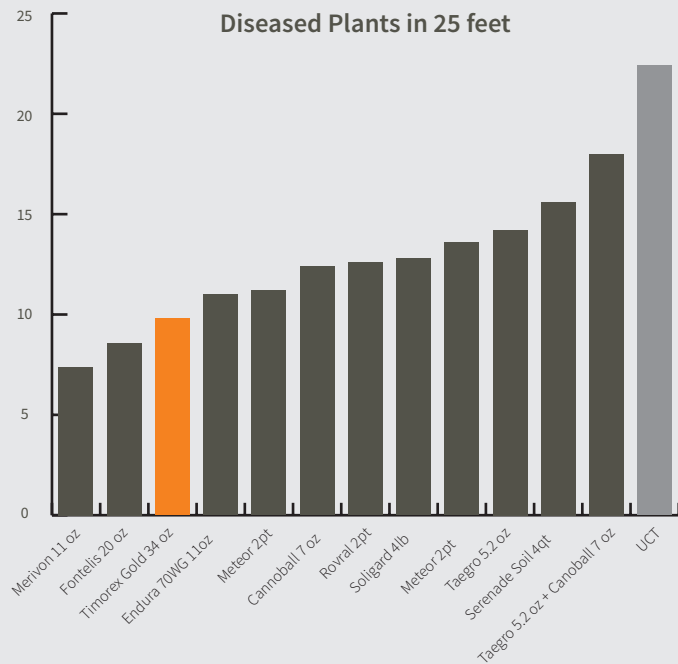

For Control of Diseases in Leafy Vegetables

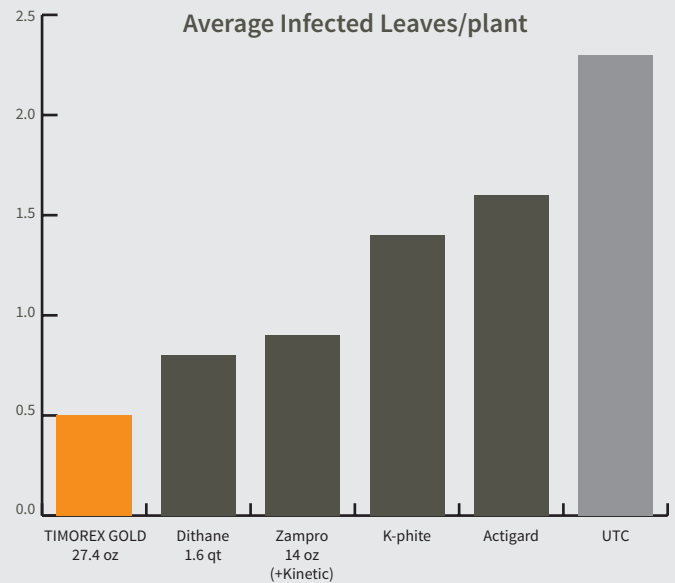

TIMOREX GOLD reduces harmful disease while improving overall yield.

Introducing TIMOREX GOLD®, a natural botanical broad-spectrum fungicide for control of Powdery and Downy Mildew and *Botrytis* (grey mold) in leafy vegetables. TIMOREX GOLD has been scientifically formulated to help keep early season disease pressures low, allowing growers to save synthetic chemistries for control of heavy late-season disease pressure. TIMOREX GOLD has a unique mode of action that helps prevent resistance in other synthetic products when used in rotational programs. Based on a plant extract from the tea tree (*Melaleuca alternifolia*) TIMOREX GOLD is not subject to residues and has a short pre-harvest interval, making it an excellent late-season choice for disease control.

Controls *Sclerotinia Minor* as Well as Chemical Standards

Controls Downy Mildew in Lettuce

Always read and follow label directions.

TIMOREX GOLD fungicide from Summit Agro USA is sold exclusively through Helena Agri-Enterprises and Tenkoz member companies. To see how TIMOREX GOLD can help improve your crop production, contact your Tenkoz member company or Helena Agri-Enterprises representative.
